Notes:

All fair value adjustments relating to remeasurement of financial assets at fair value through profit or loss and (if any) changes on revaluation of non-current assets in accordance with the mandating of fair value measurement through Other Comprehensive Income, is impacted upon by external forces and is not able to be reliably estimated at the time of budget adoption.

Fair value adjustments relating to the re-measurement of financial assets at fair value through profit or loss will be assessed at the time they occur with compensating budget amendments made as necessary.

It is anticipated, in all instances, any changes upon revaluation of non-current assets will relate to non-cash transactions and as such, have no impact on this budget document.

Cash at End of Year	13a	5,342,075	13,644,029	8,447,596

Budget Note 1 - Significant Accounting Policies

The significant policies, which have been adopted in the preparation of the Budget, are:

(a) Basis of Preparation

The budget has been prepared in accordance with applicable Australian Accounting Standards (as they apply to local government and not-for-profit entities), Australian Accounting Interpretations, other authorative pronouncements of the Australian Accounting Standards Board, the Local Government Act 1995 and accompanying regulations. Material accounting policies which have been adopted in the preparation of this budget are presented below and have been consistently applied unless stated otherwise.

Except for cash flow and rate setting information, the budget has also been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and liabilities.

(b) The Local Government Reporting Entity

All Funds through which the Council controls resources to carry on its functions have been included in the financial statements forming part of this budget.

In the process of reporting on the local government as a single unit, all transactions and balances between those Funds (for example, loans and transfers between Funds) have been eliminated.

All monies held in the Trust Fund are excluded from the financial statements. A separate statement of those monies appears at Note 14 to this budget document.

(c) 2013/2014 Actual Balances

Balances shown in this budget as 2013/14 Actual are as forecast at the time of budget preparation and are subject to final adjustments.

(d) Rounding Off Figures

All figures shown in this budget, other than a rate in the dollar are rounded to the nearest dollar.

(e) Rates, Grants, Donations and Other Contributions

Rates, grants, donations and other contributions are recognised as revenues when the local government obtains control over the assets comprising the contributions. Control over assets acquired from rates is obtained at the commencement of the rating period or, where earlier, upon receipt of the rates.

(f) Goods and Services Tax

In accordance with recommended practice, revenues, expenses, and assets capitalised are stated net of any GST recoverable. Receivables and payables in the Statement of Financial Position are stated inclusive of applicable GST.

(g) Superannuation

The Shire of Dandaragan contributes to a number of Superannuation Funds on behalf of employees. All funds to which the Council contributes are defined contribution plans.

(h) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash at bank, deposits available on demand with banks, other short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value and bank overdrafts.

Bank overdrafts are shown as short term borrowings in current liabilities in the statement of financial position.

(i) Trade and Other Receivables

Trade and other receivables include amounts due from ratepayers for unpaid rates and service charges and other amounts due from third parties for goods sold and services performed in the ordinary course of business.

Receivables expected to be collected within 12 months of the end of the reporting period are classified as current assets. All other receivables are classified as non-current assets.

Collectability of trade and other receivables is reviewed on an ongoing basis. Debts that are known to be uncollectible are written off when identified. An allowance for doubtful debts is raised when there is objective evidence that they will not be collectible.

(j) Inventories

Inventories are valued at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(k) Fixed Assets

Each class of fixed assets is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Mandatory Requirement to Revalue Non-Current Assets

Effective from 1 July 2012, the Local Government (Financial Management) Regulations were amended and the measurement of non-current assets at Fair Value became mandatory.

The amendments allow for a phasing in of fair value in relation to fixed assets over three years as follows:

- (a) For the financial year ending on 30 June 2014, the fair value of all of the assets of the local government that are plant and equipment; and
- (b) For the financial year ending on 30 June 2015, the fair value of all of the assets of the local government
 - (i)that are plant and equipment; and
 - (ii) that are -
 - (I) land and buildings; or
 - (II) infrastructure;

and

(c) for a financial year ending on or after 30 June 2015, the fair value of all of the assets of the local government.

Council has commenced the process of adopting Fair Value in accordance with the Regulations.

Land Under Control

In accordance with Local Government (Financial Management) Regulation 16(a), the Council is required to include as an asset (by 30 June 2014), Crown Land operated by the local government as a golf course, showground, racecourse or other sporting or recreational facility of state or regional significance.

As at 1 July 2014 the Shire of Dandaragan does not have any assets meeting this definition.

Initial Recognition and Measurement between Mandatory Revaluation Dates

All assets are initially recognised at cost and subsequently revalued in accordance with the mandatory measurement framework detailed above.

In relation to this initial measurement, cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition. For assets acquired at no cost or for nominal consideration, cost is determined as fair value at the date of acquisition. The cost of non-current assets constructed by the Council includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads.

Individual assets acquired between initial recognition and the next revaluation of the asset class in accordance with the mandatory measurement framework detailed above, are carried at cost less accumulated depreciation as management believes this approximates fair value. They will be subject to subsequent revaluation at the next anniversary date in accordance with the mandatory measurement framework detailed above.

Revaluation

Increases in the carrying amount arising on revaluation of assets are credited to a revaluation surplus in equity. Decreases that offset previous increases of the same asset are recognised against revaluation surplus directly in equity. All other decreases are recognised in profit or loss.

Transitional Arrangements

During the time it takes to transition the carrying value of non-current assets from the cost approach to the fair value approach, the Council may still be utilising both methods across differing asset classes.

Those assets carried at cost will be carried in accordance with the policy detailed in the Initial Recognition section as detailed above.

Those assets carried at fair value will be carried in accordance with the Revaluation Methodology section as detailed above.

Land Under Roads

In Western Australia, all land under roads is Crown land, the responsibility for managing which, is vested in the local government.

Effective as at 1 July 2008, Council elected not to recognise any value for land under roads acquired on or before 30 June 2008. This accords with the treatment available in Australian Accounting Standard AASB 1051 Land Under Roads and the fact Local Government (Financial Management) Regulation 16(a)(i) prohibits local governments from recognising such land as an asset.

In respect of land under roads acquired on or after 1 July 2008, as detailed above, Local Government (Financial Management) Regulation 16(a)(i) prohibits local governments from recognising such land as an asset.

Whilst such treatment is inconsistent with the requirements of AASB 1051, Local Government (Financial Management) Regulation 4(2) provides, in the event of such an inconsistency, the Local Government (Financial Management) Regulations prevail.

Consequently, any land under roads acquired on or after 1 July 2008 is not included as an asset of the Council.

Depreciation of Non-Current Assets

All non-current assets having a limited useful life (excluding freehold land) are systematically depreciated over their useful lives in a manner which reflects the consumption of the future economic benefits embodied in those assets.

Assets are depreciated from the date of acquisition or, in respect of internally constructed assets, from the time the asset is completed and held ready for use.

Depreciation is recognised on a straight-line basis, using rates which are reviewed each reporting period. Major depreciation periods are:

Buildings	10 to 50 years
Furniture and Equipment	5 to 20 years
Plant and Equipment	5 to 15 years
Sealed roads and streets	
formation	not depreciated
pavement	30 years
seal	30 years
Gravel roads	
formation	not depreciated
pavement	30 years
gravel sheet	15 years
pavement	50 years
Foot paths - slab	20 years
Sewerage piping	100 years
Water supply	75 years
piping &	
drainage systems	
Factorial	50.
Footpaths	50 years
Infrastructure Parks & Reserves	10 to 50 years
Infrastructure Other	10 to 50 years

The assets residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in profit or loss in the period which they arise. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained surplus.

Capitalisation Threshold

Expenditure on items of equipment under \$2,000 is not capitalised. Rather, it is recorded on an asset inventory listing.

(m) Investments and Other Financial Assets

Classification

Council classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluates this designation at each reporting date.

(i) Financial assets at fair value through profit and loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges. Assets in this category are classified as current assets.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date which are classified as non-current assets. Loans and receivables are included in trade and other receivables in the balance sheet.

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Council's management has the positive intention and ability to hold to maturity. If Council were to sell other than an insignificant amount of held-to-maturity financial assets, the whole category would be tainted and reclassified as available-for-sale. Held-to-maturity financial assets are included in non-current assets, except for those with maturities less than 12 months from the reporting date, which are classified as current assets.

(iv) Available-for-sale financial assets

Available-for-sale financial assets, comprising principally marketable equity securities, are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date. Investments are designated as available-for-sale if they do not have fixed maturities and fixed or determinable payments and management intends to hold them for the medium to long term.

Recognition and derecognition

Regular purchases and sales of financial assets are recognised on trade-date — the date on which Council commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the income statement. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and Council has transferred substantially all the risks and rewards of ownership.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in equity are included in the income statement as gains and losses from investment securities.

Subsequent measurement

Loans and receivables and held-to-maturity investments are carried at amortised cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit and loss are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss category are presented in the income statement within other income or other expenses in the period in which they arise. Dividend income from financial assets at fair value through profit and loss is recognised in the income statement as part of revenue from continuing operations when Council's right to receive payments is established. Changes in the fair value of other monetary and non-monetary securities classified as available-for- sale are recognised in equity.

Impairment

Council assesses at each balance date whether there is objective evidence that a financial asset or group of financial assets is impaired. In the case of equity securities classified as available-for-sale, a significant or prolonged decline in the fair value of a security below its cost is considered as an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss- measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss — is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments classified as available-for-sale are not reversed through the income statement.

(n) Fair Value of Assets and Liabilities

When performing a revaluation, the Council uses a mix of both independent and management valuations using the following as a guide:

Fair Value is the price that Council would receive to sell the asset or would have to pay to transfer a liability, in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made

having regard to the characteristics of the specific asset. The fair values of assets that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset (i.e. the market with the greatest volume and level of activity for the asset or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (i.e. the market that maximises the receipts from the sale of the asset after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

Fair Value Hierarchy

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurement into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level 1

Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2

Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3

Measurements based on unobservable inputs for the asset or liability.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

Valuation techniques

The Council selects a valuation technique that is appropriate in the circumstances and for which sufficient data is available to measure fair value. The availability of sufficient and relevant data primarily depends on the specific characteristics of the asset or liability being measured. The valuation techniques selected by the Council are consistent with one or more of the following valuation approaches:

Market approach

Valuation techniques that use prices and other relevant information generated by market transactions for identical or similar assets or liabilities.

Income approach

Valuation techniques that convert estimated future cash flows or income and expenses into a single discounted present value.

Shire of Dandaragan

Notes to and Forming part of the Adopted Budget for the year ended 30 June 2015

Cost approach

Valuation techniques that reflect the current replacement cost of an asset at its current service capacity.

Each valuation technique requires inputs that reflect the assumptions that buyers and sellers would use when pricing the asset or liability, including assumptions about risks. When selecting a valuation technique, the Council gives priority to those techniques that maximise the use of observable inputs and minimise the use of unobservable inputs. Inputs that are developed using market data (such as publicly available information on actual transactions) and reflect the assumptions that buyers and sellers would generally use when pricing the asset or liability and considered observable, whereas inputs for which market data is not available and therefore are developed using the best information available about such assumptions are considered unobservable.

As detailed above, the mandatory measurement framework imposed by the Local Government (Financial Management) Regulations requires, as a minimum, all assets carried at a revalued amount to be revalued at least every 3 years.

(o) Impairment

In accordance with Australian Accounting Standards the Shire's assets, other than inventories, are assessed at each reporting date to determine whether there is any indication they may be impaired.

Where such an indication exists, an estimate of the recoverable amount of the asset is made in accordance with AASB 136 'Impairment of Assets' and appropriate adjustments made.

An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

For non-cash generating assets such as roads, drains, public buildings and the like, value in use is represented by the depreciated replacement cost of the asset.

At the time of adopting this budget, it is not possible to estimate the amount of impairment losses (if any) as at 30 June 2014.

In any event, an impairment loss is a non-cash transaction and consequently, has no impact on this budget document.

(p) Trade and Other Payables

Trade payables and other payables are carried at amortised cost. They represent liabilities for goods and services provided to the Municipality prior to the end of the financial year that are unpaid and arise when the Municipality becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

(q) Employee Benefits

The provisions for employee entitlements relates to amounts expected to be paid for long service leave, annual leave, wages and salaries and are calculated as follows:

(i) Wages, Salaries and Annual and Long Service Leave (Short-term benefits)

The provision for employee entitlements to wages, salaries, annual leave and long service leave expected to be settled within 12 months represents the amount that the municipality has a present obligation to pay resulting from employees' services provided to balance date. The provision has been calculated at nominal amounts based on remuneration rates the Council expects to pay and includes related on-costs.

(ii) Long Service Leave (Long-term benefits)

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and

currency that match as closely as possible, the estimated future cash outflows. Where Council does not have the unconditional right to defer settlement beyond 12 months, the liability is recognised as a current liability.

(r) Interest-bearing Loans and Borrowings

All loans and borrowings are initially recognised at the fair value of the consideration received less directly attributable transaction costs.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Fees paid on the establishment of loan facilities that are yield related are included as part of the carrying amount of the loans and borrowings.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(s) Provisions

Provisions are recognised when: The council has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

(t) Current and Non-Current Classification

In the determination of whether an asset or liability is current or non-current, consideration is given to the time when each asset or liability is expected to be settled. The asset or liability is classified as current if it is expected to be settled within the next 12 months, being the Council's operational cycle. In the case of liabilities where Council does not have the unconditional right to defer settlement beyond 12 months, such as vested long service leave, the liability is classified as current even if not expected to be settled within the next 12 months. Inventories held for trading are classified as current even if not expected to be realised in the next 12 months except for land held for resale where it is held as non-current based on Council's intentions to release for sale.

Note 3 – Acquisition of Assets

SHIRE OF DANDARAGAN BUDGET NOTE 3

ACQUISITION OF ASSETS for the year ended 30 June 2015

Description Budget 3. ACQUISITION OF ASSETS \$	
3. ACQUISITION OF ASSETS \$	
The following assets are budgeted to be acquired during the year	
BY PROGRAM	
Governance	
Land and Buildings 196,	,025
Plant and Equipment 111,	,000
Furniture and Equipment 9,	,900
Law Order & Public Safety	
Land and Buildings 18,	,500
Plant and Equipment 82,	,000
Furniture and Equipment 30,	,650
Health	
Land and Buildings 38,	,210
Furniture and Equipment 5,	,593
Community Amenities	
Land and Buildings 3,547	,420
Infrastructure - Parks and Reserves 11,	,000
Infrastructure - Other / Drainage 3,434	,474
Recreation and Culture	
Land and Buildings 371,	,868
Infrastructure - Parks and Reserves 1,112	,492
Infrastructure - Other / Drainage 103,	,429
Transport	
Land and Buildings	870
Plant and Equipment 1,068,	,500
Infrastructure - Roads 4,110,	,702
Infrastructure - Parks and Reserves 75,	,000
Infrastructure - Other / Drainage 98,	,000
Economic Services	
Infrastructure - Other / Drainage 24,	,000
Other Property and Services	
	,948
14,491,	.581
BY CLASS	
Land and Buildings 4,214,	,841
Plant and Equipment 1,261,	,500
Furniture and Equipment 46,	,143
Infrastructure - Roads 4,110	,702
Infrastructure - Parks and Reserves 1,198,	492
Infrastructure - Other / Drainage 3,659,	,903
14,491,	.581

A detailed breakdown of acquisition on an individual asset basis can be found on the following pages.

Unspent Debentures:Council had no unspent debenture funds as at 30th June 2014 nor is it expected to have unspent debenture funds as at 30th June 2015.

Overdraft:
Council utilised an overdraft facility during 2013/2014 but did not require it at 30th June 2014. Details of this facility can be found at note 12. It is anticipated this facility will be required during 2014/15. <u>ပ</u>

Note 6 - Reserve Accounts

Pursuant to section 6.11 of the Local Government Act 1995 the Shire of Dandaragan will change the purpose and / or use of money for several of its reserves as follows:

Building Reserve

The "Building Reserve" is to be renamed to "Building Renewal Reserve" with the purpose changed to "to fund capital renewal of buildings and associated assets as guided by the Building Asset Management Plan."

Rubbish Reserve

The "Rubbish Reserve" purpose is to be changed to "to be used to fund establishing, enhancing, rehabilitation or any other activities associated with new and existing landfill or waste sites"

Caravan Park Reserve

The "Caravan Park Reserve" purpose is to be changed to "to be used to fund improvements, other works and the promotion of caravan parks and their surrounds. To also fund planning, feasibility and establishment of new caravan parks."

Playground Reserve

The "Playground Equipment Reserve" is to be closed and the purpose of the money held in this reserve is to be changed and moved to the "Public Open Space Renewal Reserve" with the purpose "to fund capital renewal of public open space and associated assets as guided by the Public Open Space Asset Management Plan."

Parking Requirements Reserve

For clarity the "Parking Requirements Reserve" is to be renamed "Parking Requirements Reserve (Lot 1154 Sandpiper Street)" with the purpose of the reserve changed to "to fund future parking requirements in the Shire of Dandaragan in the vicinity of Lot 1154 Sandpiper Street, Jurien Bay as separately identified."

Parks and Recreation Grounds Development Reserve

For clarity the "Parks and Recreation Grounds Development Reserve" is to be renamed "Parks and Recreation Grounds Development Reserve (Seagate Estate)" with the purpose of the reserve changed to "to fund the future purchase of land or development of parks and recreation grounds in the locality of Seagate Estates as separately identified or with Ministerial approval, for the improvement or development of parks and recreation."

Landscaping Reserve

For clarity the "Landscaping Reserve" is to be renamed "Landscaping Reserve (Lot 1154 Sandpiper Street)" with the purpose of the reserve changed to "to fund future landscaping requirements in the Shire of Dandaragan in the vicinity of Lot 1154 Sandpiper Street, Jurien Bay as separately identified."

Shire of Dandaragan

Notes to and Forming part of the Adopted Budget for the year ended 30 June 2015

Long Service Leave Reserve & Annual Leave Entitlements Reserve

The "Long Service Leave Reserve" and "Annual Leave Entitlements Reserve" are to be closed and the purpose of the money held in these reserves are to be changed and moved to a new reserve "Leave Reserve" with the purpose "to fund annual leave and long service leave entitlements."

Road Construction Reserve & Footpath Construction Reserve

The "Road Construction Reserve" and "Footpath Construction Reserve" are to be closed and the purpose of the money held in these reserves are to be changed and moved to a new reserve "Infrastructure Construction Reserve" with the purpose "to fund capital renewal of infrastructure and associated assets as guided by the Infrastructure Asset Management Plan."

Coastal Foreshore Development Reserve

The "Coastal Foreshore Development Reserve" is to be closed and the purpose of the money held in this reserve is to be changed and moved to "Public Open Space Construction Reserve" with the purpose "to fund capital construction and/or purchase of public open space and associated assets."

Housing Reserve

The "Housing Reserve" is to be closed and the purpose of the money held in this reserve is to be changed and moved to "Building Construction Reserve" with the purpose "to fund capital construction and/or purchase of infrastructure and other associated assets."

Infrastructure Construction Reserve

The "Infrastructure Construction Reserve" is to be established with the purpose of the money held in this reserve to be "to fund capital construction and/or purchase of infrastructure and associated assets."
